Problem Some of the resources for the prototype referenced in the second version of this CCR have been identified and have been secured for this purpose. Ed Finch of HTSC is awaiting approval of this CCR to begin work.								
Proposed Solution 1) Ed Finch to attach the two allocated external 2 GB Sun disks to the Sun machine "msfcsun2", which has ECN #00001357.								
2) Bob Keener has approved usage of "hutch", an HP 712/60 which has HAC ID H-C67221. Ed Finch to attach the two allocated external 4 GB HP disks to the HP machine "hutch".								
3) Charles Brown to supply two internal 2 GB SGI disks. The disks should be inventoried into the loaner pool and signed out to the Challenge DM named "msfcsgi3", with ECN # 00001226. Ed Finch to attach the disks to the "msfcsgi3".								
4) Ed Finch to enable access to "msfcsun2", "hutch", and "msfcsgi3" to Ramsey Billups, Wayne Blake-Hedges, Howard Ausden, Paul Davenport, Shabahat Husain (already has access to "msfcsun2"), and Henry Robertson.								
5) Darryl	Washington to sec	cure the 3 rd D	FS license for	r Rel A.1's	usage on th	e Rel A.1/E	B prototype.
